## Team HDC Is Heading To Poland!

APIIT-UCTI STUDENTS WIN MICROSOFT MALAYSIA'S IMAGINE CUP 2010

● Team HDC (Home Dietary Consultants) from APIIT-UCTI have emerged victorious amongst 29 other teams with their innovative creation the "Project Apple", a dietary and nutrition planning system at the eighth annual Imagine Cup that was held in Langkawi on 20 May.

The theme for this year's competition was "Imagine a world where technology helps solve the toughest problems" and participants were given the task to use technology to make a difference on issues in education, healthcare and environmental sustainability. Some of the projects included ideas to eradicate extreme poverty and hunger, reduce child mortality and combat HIV/AIDS.

"We are indeed very happy and proud with the outcome of this year's competition. Year on year, we have seen

students coming up to the competition more committed and determined in showcasing their inventions and making a difference," said YB Prof Datuk Dr. Ahmad Yusoff Hassan, Vice-Chancellor of Universiti Teknikal Malaysia Melaka (UTeM) regarding the competition this year.

As winners of the Malaysian finals, Team HDC will now represent Malaysia in the worldwide finals and showcase their innovation alongside hundreds of other students around the world in Warsaw, Poland in July. Other than cash and prizes awarded, the top teams in this global competition also gain real-life experience, make new friends and attend several training sessions to help them improve the chances of turning their ideas into reality.
