10 new AIDS patients every day

THE total number of AIDS patients in the country is 87,000 people currently and about 10 new patients are infected every day.

The increase of female AIDS patients in the country is worrying. Ten years ago, female patients were only five per cent of the total and the amount quadrupled to the current 20 per cent.

The government needs to increase people's awareness of AIDS and to stop the spread of the disease. — *Kwong Wah Daily*
