More women infected by aids due to lack of knowledge

KUALA TERENGGANU: More women are affected by AIDS/HIV due to lack of exposure and knowledge on the disease, Terengganu Cakna Community (KCT) president, Dr Mustapa Che Omar said.

He said the situation was becoming more serious with more housewives contracting the disease due to their husband's unhealthy activities.

He expressed KCT's concern with the development because of its implication on the family institution.

"We sympathise with these women and conduct briefing sessions to enlighten them on the disease, but some of them belittled our efforts," he told Bernama here yesterday.
