### Children against AIDS

School children holding placards as they participate in an AIDS awareness rally on the eve of World AIDS Day in Jammu, the winter capital of Kashmir, in India. The number of HIV/AIDS-related deaths among teenagers worldwide increased by 50% between 2005 and 2012 showing an alarming trend, according to a report by the UN Children's Fund Unicef published on Friday. World AIDS Day which is organized by the United Nation's AIDS Organisation Uniaids is annually celebrated on Dec 1. Acquired Immune Deficiency Syndrome (AIDS) is a disease caused by the HIV (Human Immunodeficiency Virus) affecting the immune system and making it more vulnerable to infections and diseases. — EPA
